

Location

- Driveways shall be a minimum of two feet (2') from the property line. If a driveway is to be closer than two feet from the property line, it must be approved by the Engineering Division prior to the permit being issued.

Other requirements

- A driveways maximum width at the front property line (public sidewalk) shall be twenty feet (20'). Driveways wider than twenty feet (20') must taper down to twenty feet (20') at a forty-five degree (45) angle.
- Driveway aprons shall have a two foot (2') or three foot (3') flare.
- Driveway aprons must initially be constructed of concrete or paving bricks. Asphalt shall only be permitted for resurfacing of existing concrete or brick.
- Driveway width and apron width shall match at property line.

Permit Submission Requirements

In addition to a completed application, all permit submissions are required to include the following information:

- A plat of survey indicating the location of the driveway. The survey should clearly indicate the driveway width and apron width at the front property line.

In most cases, your driveway permit will be issued over the counter. If for some reason this cannot be accomplished, you will be given an approximate date when your permit will be issued.

for your Project*

Elk Grove Village
Home Improvement
Series

Why apply for a permit?

When you apply for a permit, you are assisting the Village in conducting a plan review and the subsequent inspections that will ensure that all construction in the community meet specific safety and quality guidelines.

The Village is on your side. We want to ensure that you will enjoy your driveway for many years to come. The permit you receive for this project will allow us to do just that.

Elk Grove Village is dedicated to assisting its residents. The Department of Engineering & Community Development will show you this dedication as you apply for and receive your driveway permit.

The Permit Process

1

Obtain a permit application from the Department of Engineering & Community Development which is located on the lower level of the Charles J. Zettek Municipal Building at 901 Wellington Avenue.

2

Return the completed application with a copy of your plat of survey to the Department of Engineering & Community Development. Please refer to submission requirements for additional necessary information.

3

After you receive your permit, make sure to call for your required inspections.

Inspections

Inspections required at various stages of the project are:

Pre-Pour

Prior to the placement of concrete, asphalt, or other driveway materials. This is done to insure proper base and framing (if necessary).

Final

When driveway and restoration of landscaping is completed.

Requesting Inspections

To schedule an inspection, contact the Department of Engineering & Community Development at (847) 357-4220, Monday through Friday between the hours of 8:00 a.m. and 5:00 p.m. Requests for inspections must be made 24 hours in advance. Please have your permit number ready when you call.
